

FIG. 1 - Permeability at 796 A/m versus Final Thickness Using Cooling Rate $\leq 15^{\circ}\text{C/sec}$

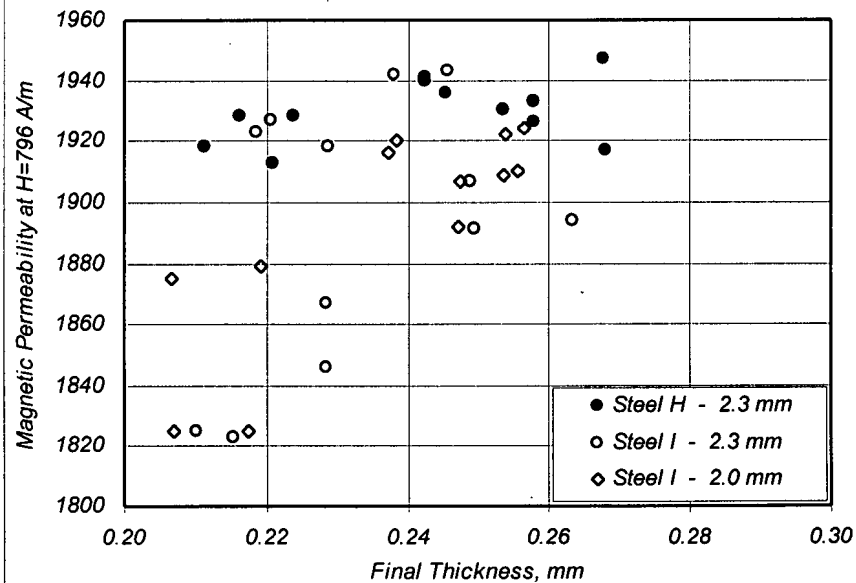

FIG. 2 - Permeability at 796 A/m versus Final Thickness Using Cooling Rate $\geq 50^{\circ}\text{C/sec}$

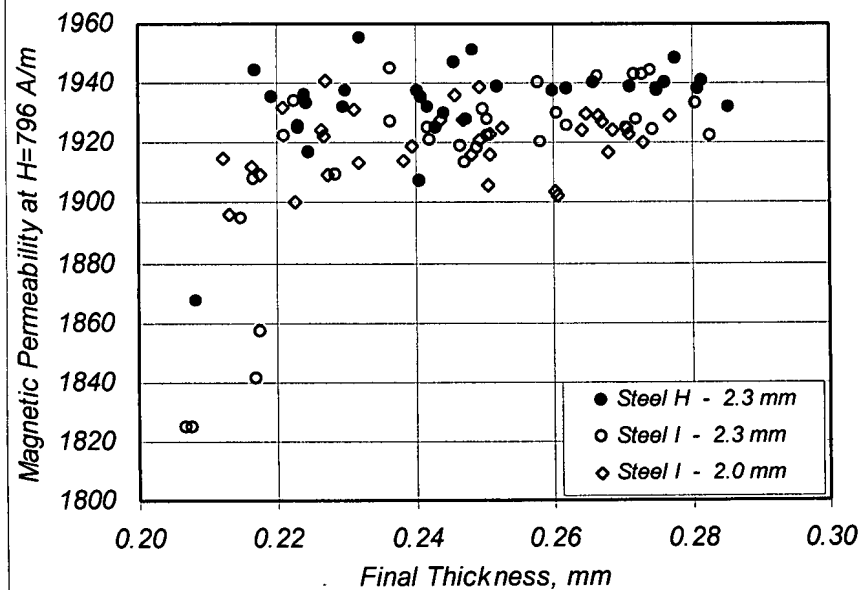

FIG. 3

*Cooled at a rate of less than
15°C per second.*

*Cooled at a rate of in excess of
than 50°C per second.*
